SURE Synergy Workshop 10 Synthesizer and Status Seminar

07.09.2023 at 09:00 AM CET, via Zoom

Agenda

- 09:00 Welcome
- 09:05 Status Seminar update and discussion
- 10:00 Break
- 10:05 Input on Synthesizer Concept & Next Steps
- 10:40 Discussion and interactive session with SURE Data
- 11:30 Closing remarks

Synthesis and Status Seminar

The Status Seminar in Bangkok represents a milestone in our joint journey. It provides an opportunity to showcase the progress achieved so far, share research findings, and receive valuable feedback from peers. Therefore, to ensure a seamless seminar experience for all participants, the first part of Synergy Workshop is dedicated to discussing seminar details, arrangements, travel logistics, side events planning, and other updates and requests.

The workshop's primary objective is to introduce the Synthesizer Concept and approach developed through the synthesis research, while also providing a preview of the visual representation of the collected SURE data. Accurate and reliable project data is crucial for program synthesis and establishing cross-project synergies. Therefore, the workshop will explore data visualizations to discuss project-specific and overall funding priority insights. The interactive session will offer participants the opportunity to update, validate, and enhance the data.
